View version update: You can set automatic update or manual update.

#Annotation

##What is annotation?

The annotation function allows users to write content and annotate information on the current screen.

##How to start annotation

Function Access

The following scenarios are available to access the annotation

Scenario 1: When you play PPT locally or via casting, the annotation toolbar appears; at this point, click the annotation button to enter the annotation.

Note: If the page turn button remains after entering the annotation for some PPT versions, you can realize the annotation with the page at the time.

Scenario 2: In other cases, there is an annotation button in the sidebar, click to enter the freeze screen annotation mode.

#Mini Blackboard

##What is a mini blackboard

A mini-blackboard is a floating writing board that can be summoned from any interface for temporary content creation.

##How to use mini blackboard?

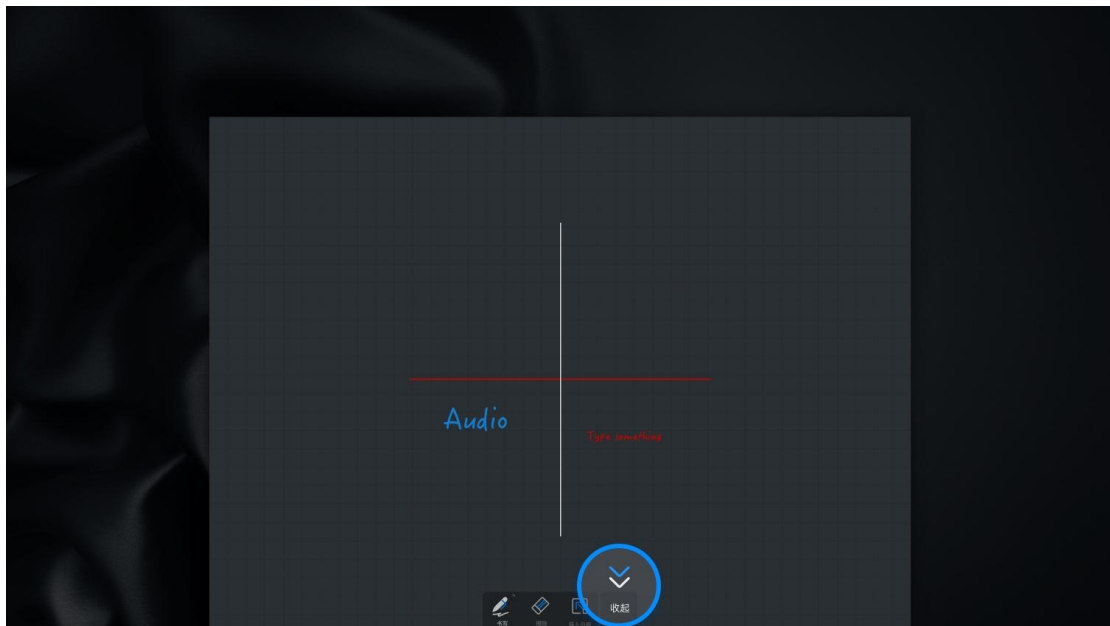

summoning mini blackboard

Pull up from the bottom of the conference tablet to summon the mini blackboard. Note: It is not possible to summon or put away the mini blackboard under the freeze screen annotations and whiteboard full screen modes.

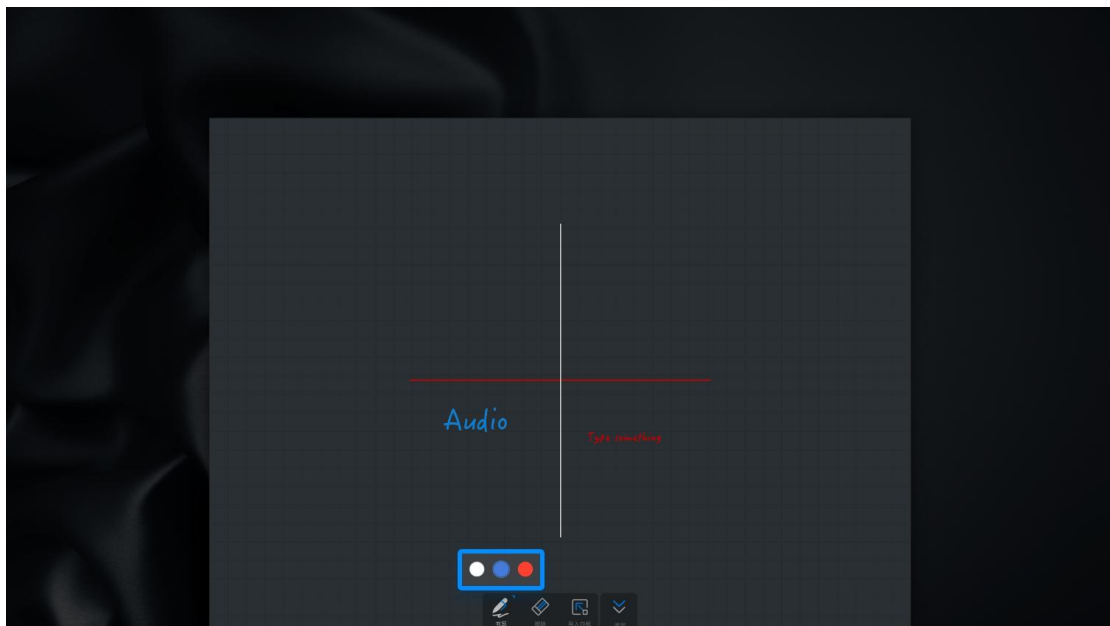

There are two ways to put away the mini blackboard.

Method 1: Click the "Put Away" button on the bottom toolbar to hide it.

Method 2: Press with multiple fingers and quickly move down.

use mini blackboard

#Wireless screen transfer

##What is Wireless screen transfer?

Wireless screen transfer can project the screen of laptops, cell phones and other devices onto the conference board and display it to the audience without using wires to connect the conference board.

##How to use wireless screen transmitter to transmit screen?

1. Screen transmitter pairing

2. Wireless screen transmitter startup

85

3. Wait for an upgrade to the wireless screen transmitter.

4. Waiting for wireless screen transmitter pairing

5. The wireless screen transmitter is successfully paired with the conference board.

Note: There is no need to pair wireless screen transmitters that have already been successfully paired; please skip this step.

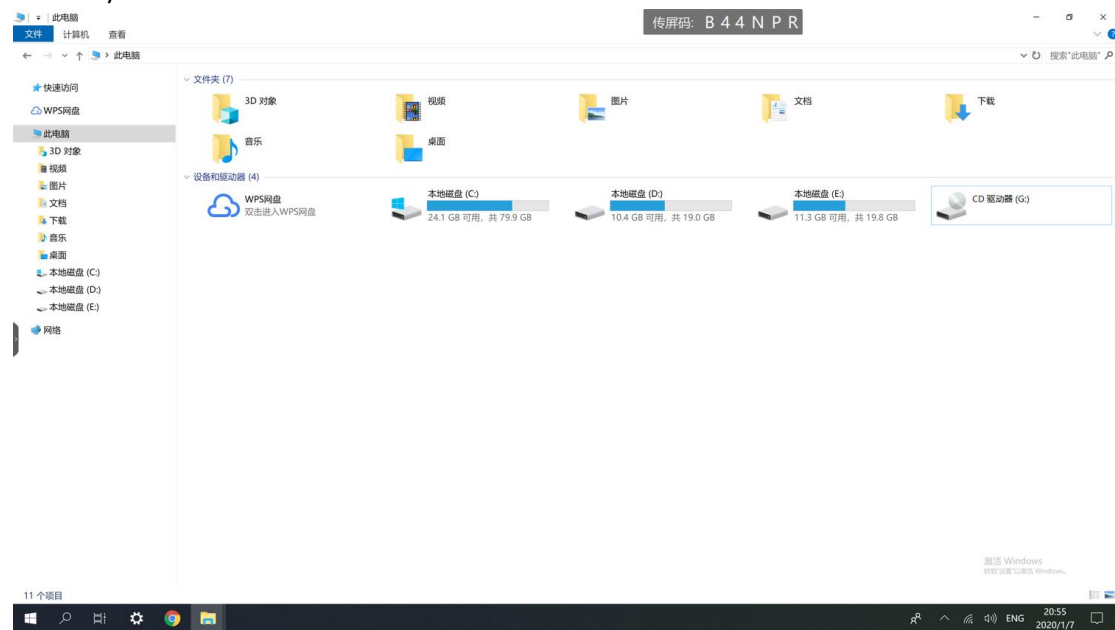

6. Plug the wireless screen transmitter into your laptop USB port (some computers that only have Type-C ports need to use an adapter, or directly purchase a screen transmitter with Type-C port).

7. When using it for the first time, Apple computer users should locate the application icon on their desktop, as shown below, and then click to open and run the program.

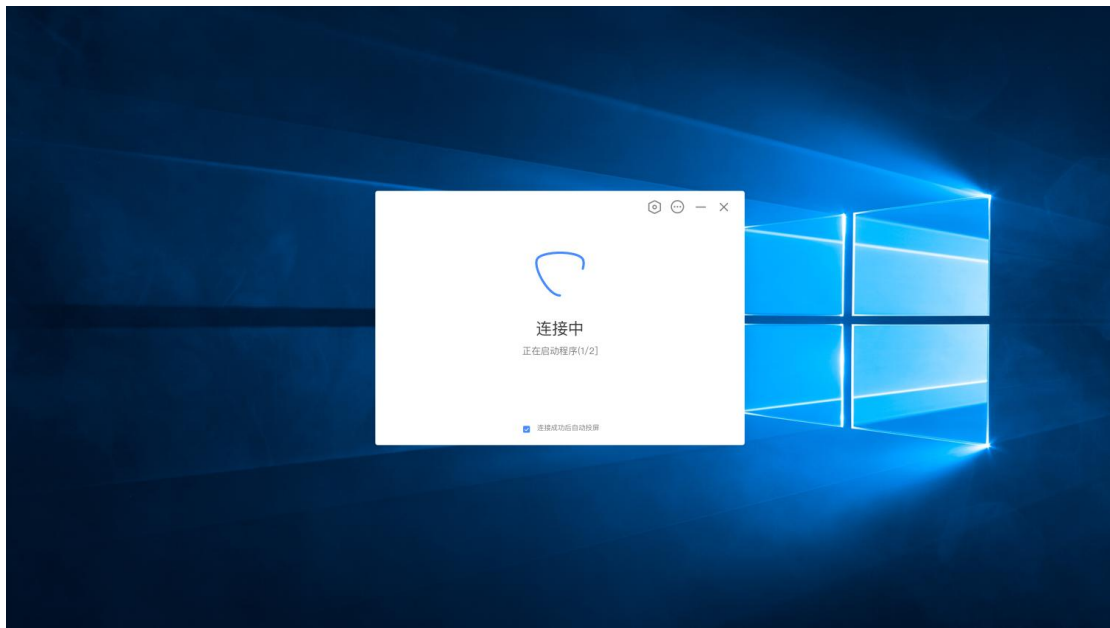

8. Windows PC users please open My Computer, select the CD drive and run "ScreenShare.exe" manually.

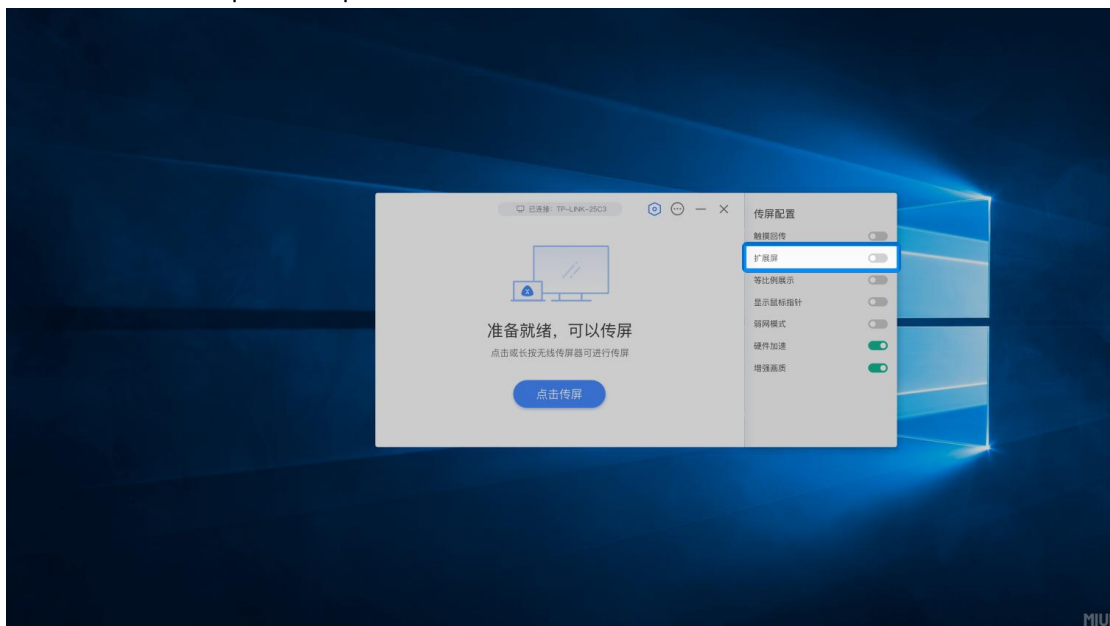

Note: The first time you use the program, you must run it manually; subsequent uses can skip this step.

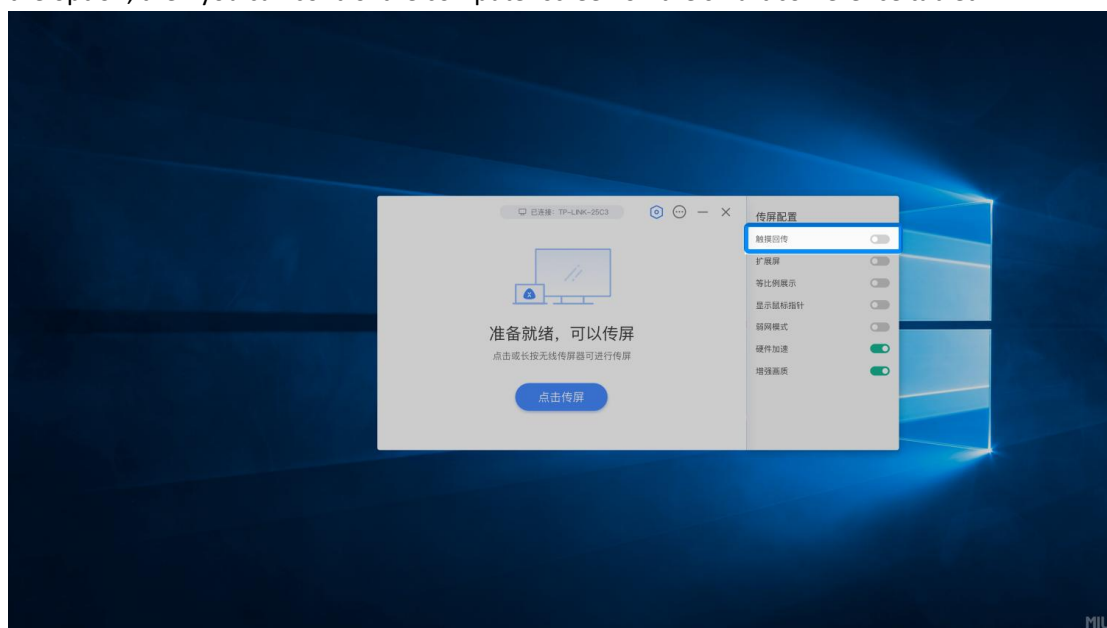

9. When you launch the program, the computer will automatically connect to the paired smart conference tablet, the wireless screen transmitter light will flash to indicate that it is being connected, and the screen transmitter light will remain on to indicate that the connection is successful and in a shareable state.

10. Press the cast button to cast screen to share when the screen transmitter light is always on.
11. Press the wireless screen transmitter button again to disconnect the screen cast and be in a shareable ready state.
12. Casting on the big screen. To achieve the conference tablet as the computer's extended screen transfer screen, open the screen transfer application on the computer side (as in step 7). You can select the option to open the extended screen after the screen transfer.

13. Switch on the touch screen function. You can choose to turn on the touch screen function in the option, then you can control the computer screen on the smart conference tablet.

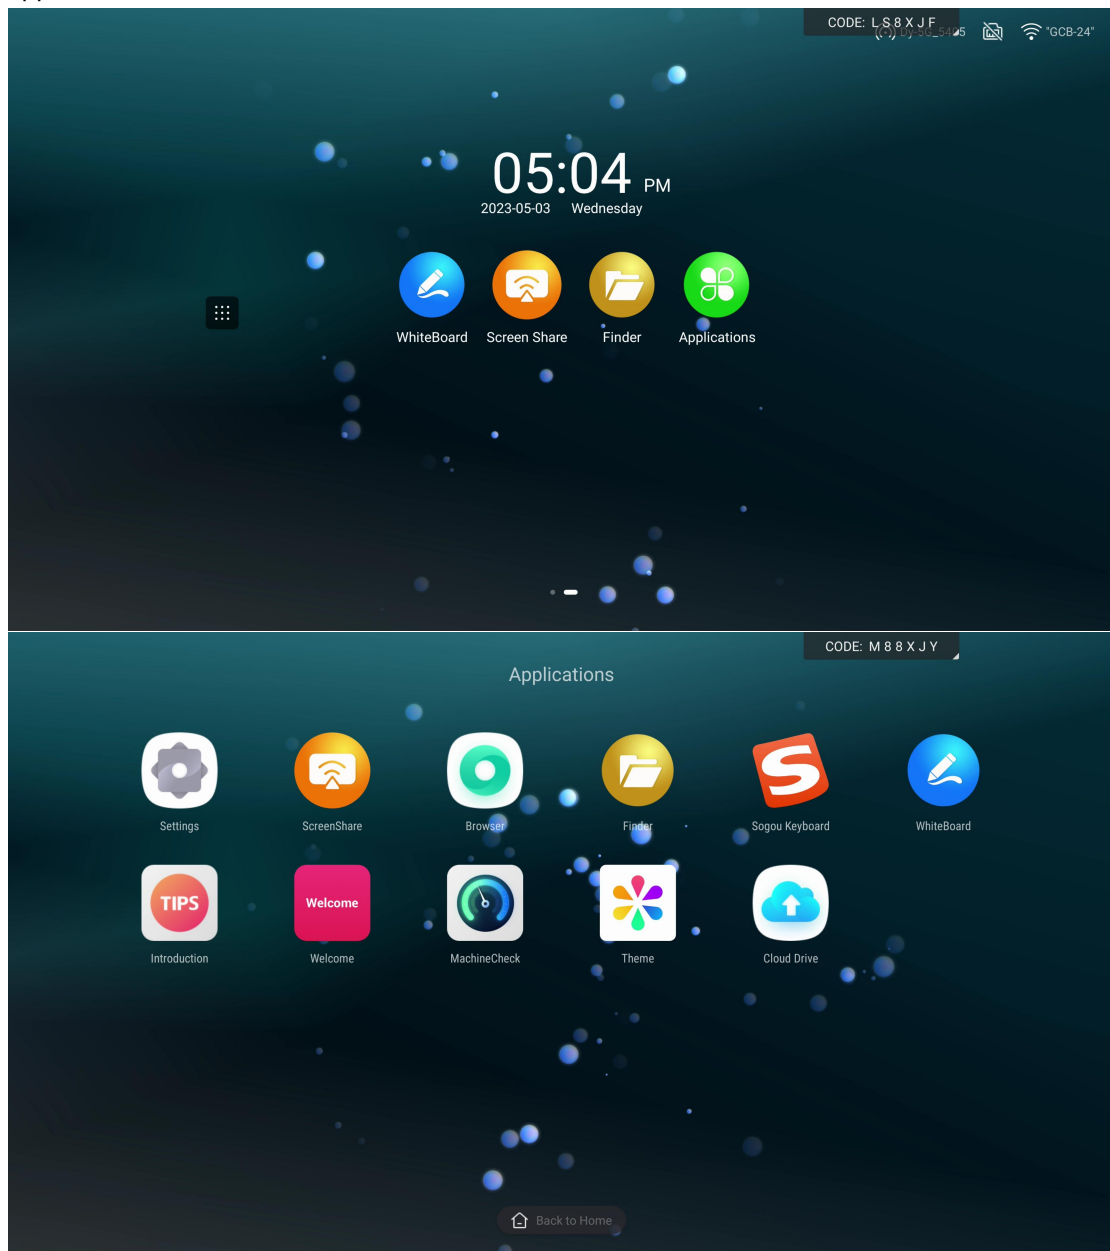

How to use computer screen transfer assistant software to transfer screen

1. Please download the computer screen transfer assistant in advance at (<https://www.meeting-vip.com/share/>)

 PC客户端 Win7及以上系统 下载	 Mac客户端 MacOS 10.11及以上系统 下载	 Android客户端 Android5.0及以上系统	 iOS客户端 iOS11.0及以上系统
--	--	---	--

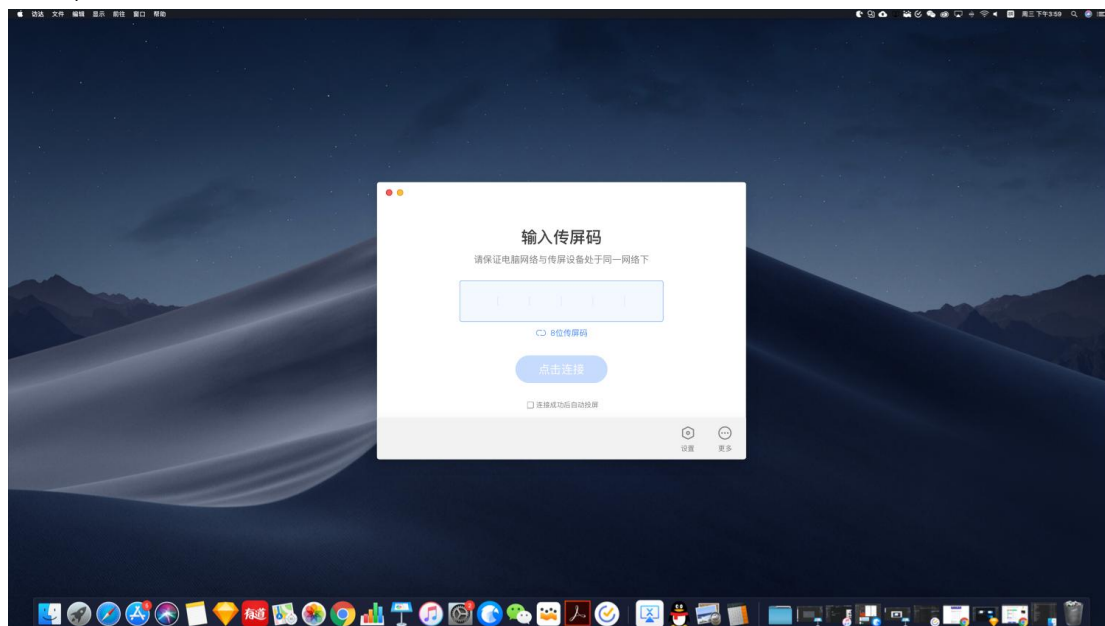

2. Click More Apps, find Wireless Screen Transfer, and open the Wireless Screen Transfer application.

3. After you open it, you can see the wireless screen transfer guide and find the screen transfer code.

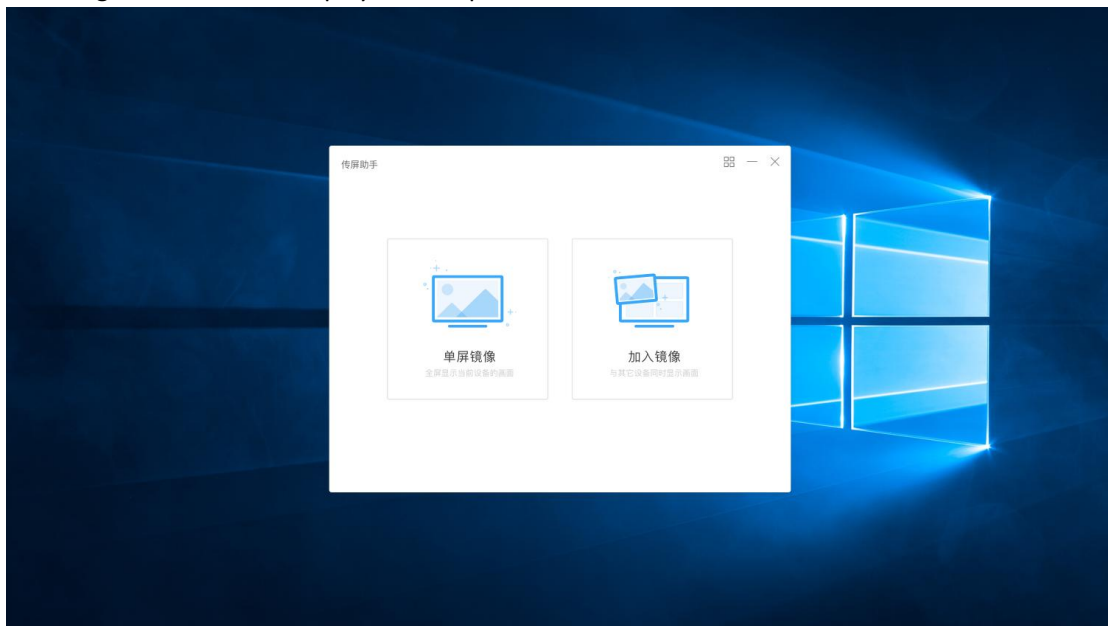

4. Open the screen transfer assistant, enter the screen transfer code on the smart conference board, and click "Connect Device".

Choose single screen mirroring, when another party is casting to the screen, it will seize the screen on the smart conference board to cast; choose join the mirroring, when another party is casting the screen, the display will be split screen.

5. You can cast your screen after selection.

##How to do mobile screen transfer

How to do mobile screen transfer

1. Please download the Screen Transfer Assistant in advance at (<https://www.meeting-vip.com/share/>).
2. Open the screen transfer assistant on the conference board, you can see the wireless screen transfer guide

A screenshot of the ScreenShare web interface. At the top right, a dark box displays the code 'CODE: M88XJY'. Below this, the interface is divided into two main sections: 'Mobile device' and 'Computer'. The 'Mobile device' section features a large QR code and a list of three steps: scanning the QR code to download the app, opening the app, and following the guidelines. The 'Computer' section shows a simulated 'Enter the code' dialog box with the code 'M88XJY' and a list of three steps: downloading the app, connecting to the network 'GCB-24', and entering the code. At the bottom, a note states: 'Apple products can be cast by AirPlay by connecting hot spots'. The interface also shows 'Wireless Screenshare' with hotspot details: 'Hotspot: Dy-5G_4255' and 'Password: 12345678'.

3. Use the mobile phone screen transfer assistant, click the scan button and scan the QR code on the wireless screen transfer guide to connect.

4. Wait for a successful connection.

5. The connection is successful and the following functions can be selected for screen transfer.

Screen sharing: the screen of the mobile phone can be shared to the smart conference tablet for display;

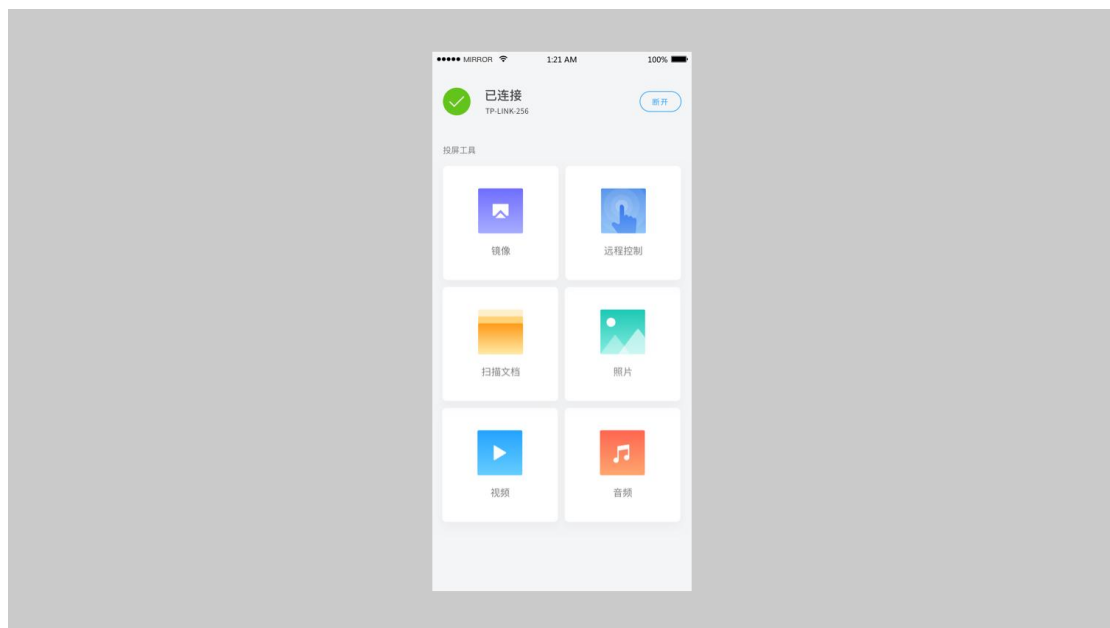

Picture display: pictures from mobile phone can be shared to the smart conference tablet for display;

Video play: videos from mobile phone can be shared to smart conference tablet for play;

Audio play: audio from mobile phone can be shared to smart conference tablet for play;

Document scanning: documents can be scanned by using mobile phone camera and shared to the smart conference tablet for display;

Conference tablet controller: You can use your mobile phone to control the smart conference tablet in real time.

#Document Management

##What is document management?

Document management for local document management allows you to open all types of files for content display (conference table needs to be pre-installed to open the corresponding file types of software clients)

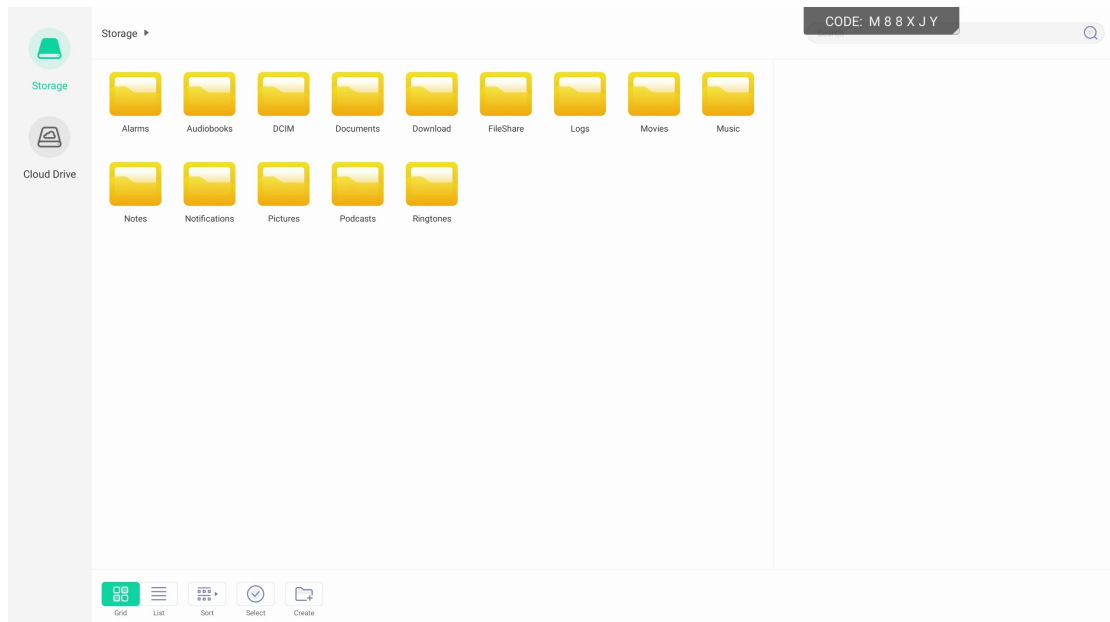

##How to use document management?

1. Click the "Document Management" icon on the homepage to launch the Document Management App.
